

Bind To Enum:

```
<DropDownList @ref="dropdownList" @bind-Value="orderType" Disabled="disable" />
<button class="t-button" @onclick="async () => await DropdownFocus()">Focus</button>
```

Filter Items:

```
<DropDownList @bind-Value="orderType" FilterFunc="orderType => orderType != Model.OrderType.Salon" />
```

```
@code
{
    bool disable;
    OrderType? orderType;
    DropDownList< OrderType?> dropdownList;
    WindowStatus status;

    async Task DropdownFocus()
    {
        await dropdownList.FocusAsync();
    }
}
```
