

Single Line:

```
<StringTextBox @ref="textBox" @bind-Value="title" Disabled="disable"  
    MaxLength="maxlength" BindingType="bindingType" />
```

Multi Line:

```
<StringTextBox @ref="textBox1" @bind-Value="title1" MultiLine  
    Disabled="disable1" Rows="4" MaxLength="maxlength1" />
```

```
@code {  
    bool disable;  
    string title;  
    int maxlength = 12;  
    StringTextBox textBox;  
    BindingType bindingType = BindingType.OnChange;  
    //Multi Line-----  
    bool disable1;  
    string title1;  
    int maxlength1 = 25;  
    StringTextBox textBox1;  
  
    async Task SetFocus()  
    {  
        await textBox.FocusAsync();  
    }  
  
    async Task SetFocus1()  
    {  
        await textBox1.FocusAsync();  
    }  
}
```
