```csharp
[Table("Countries ", Schema = "demo")]
public class Country
{
    [Key]
    public int Id { get; set; }

    [DisplayName("Title")]
    public string Title { get; set; }

    [DisplayName("Status")]
    public ActiveType ActiveType { get; set; }

    [CheckOnDelete("The country has Cities and can not removed")]
    public virtual IList<City> Cities { get; set; }
}
```
